

- System requirements

- **Windows**

- Microsoft Windows 7, 8, 10, 11.

- VST3 host software (64 bit only).

- **Mac**

- Mac OS X 10.5.7 or higher. (Not M1, M2 or Mx native yet)

- AU or VST3 host software (64 bit only).

- Installation

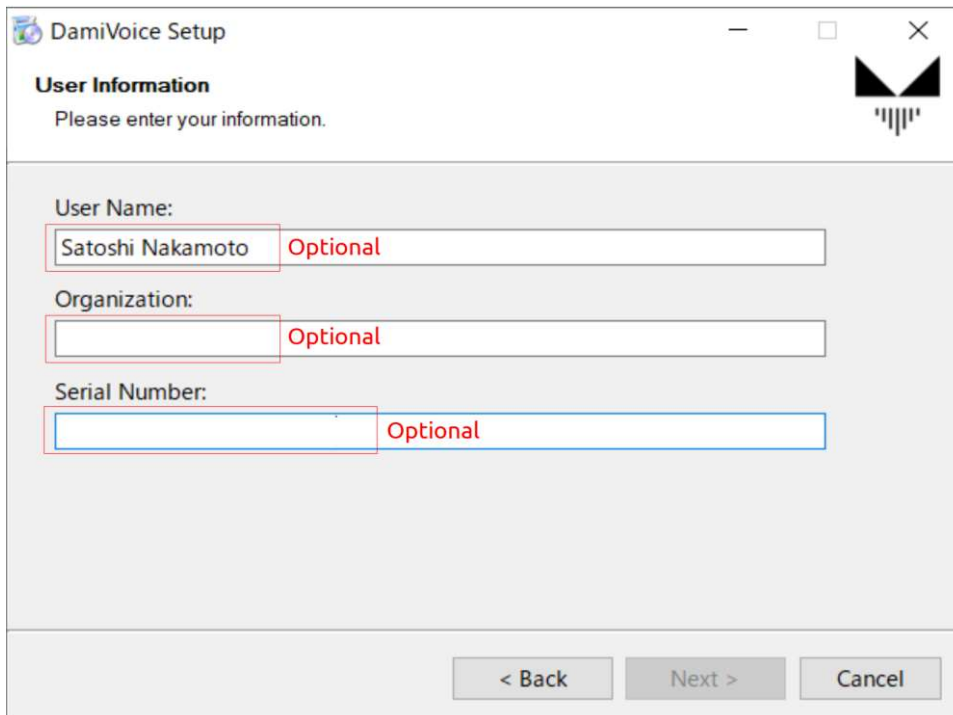

- Before installing our plug-ins, Please close all your host applications.

- <Windows> 

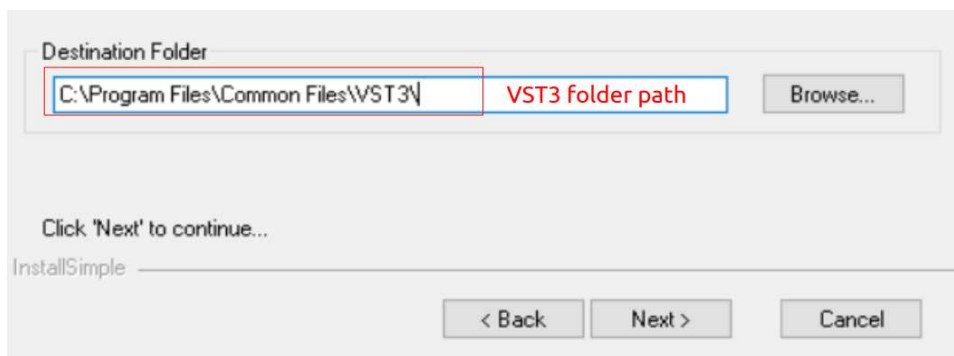

1. Unzip the download package, run the Installer and follow the instructions on the screen.
Possible Installation warning on Windows:

- After running the software installer (.exe), and follow the steps of the wizard to install the software on your machine. If you see the User Information dialog like the image below, you can leave all blank, then click “Next”. You can input your serial number emailed from us, if you want to. (In case you have not received your serial number, please check your junk mail box before contacting us.)

- During the installation you will be asked where you want the software to be installed. For the windows VST3 version, you should install the plugin inside the VST3 plug- ins folder used by your host application(s). The default path set in the installer should work for most applications, but you should check your host software documentation to know where it looks for VST3 plug- ins.

<Mac> 

- Unzip the download package, run the Installer and follow the instructions on the screen. After the successful installation and plugin scanning by the host, the plugin should be available the next time you start your DAW. The default plugin installation folder paths are shown below.

Format	Platform	Path
VST3	64-bit	/library/audio/plugin-ins/vst3
AU	64-bit	/library/audio/plugin-ins/components

- **Activation**

1. In order to activate your plugin, you need your serial number and activation key# (or key file whose file extension is .mkey alternatively).

Serial number: 20digits number with dash"- " emailed from minimalinst@gmail.com after the purchase of license.

e.g. [64722-56273-21378-52387](#)

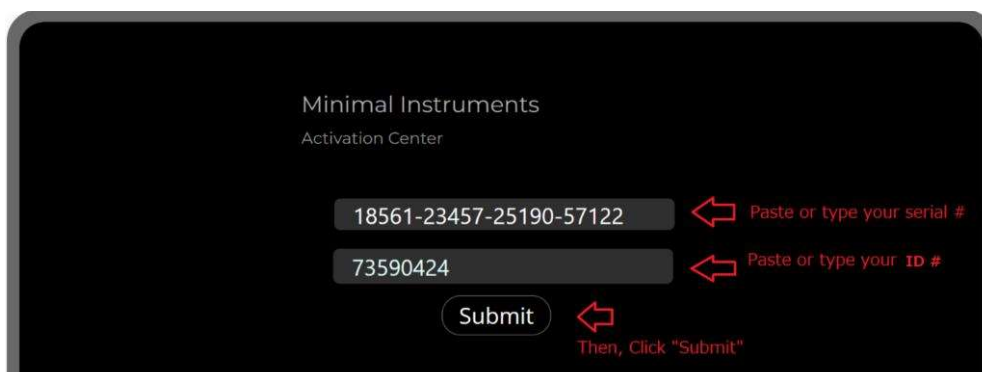

Activation Key#: 7 (or 8) digits number which will be emailed from us(minimalinst@gmail.com) separately after request is submitted in the web form, explaining in the section below.

e.g. [7164928](#)

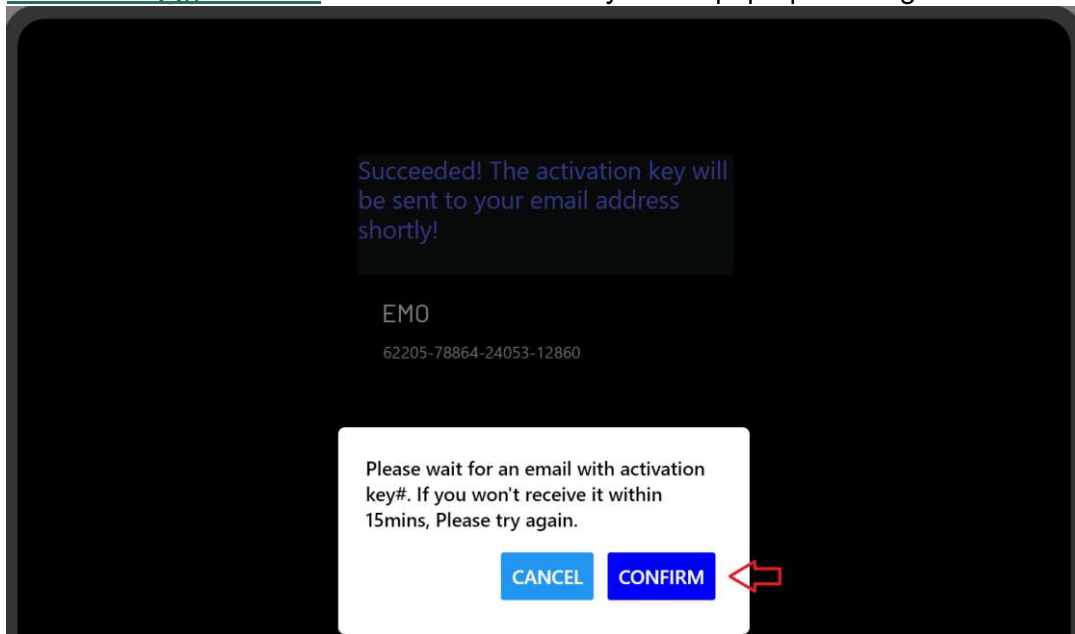

2. Open the plugin in the supported host (DAW). You should see the initial screen like the image below. **STEP1**:①Copy the ID # (this is not activation key#) shown in the light blue cell (or write it down on your memo pad or something). Then ②click the button called "Go to Activation Center", then you will navigate to the activation center web site.(If you are not navigated, please open browser manually and go to <https://minimalinst.cafe24shop.com/skin-skin23/member/login.html>)

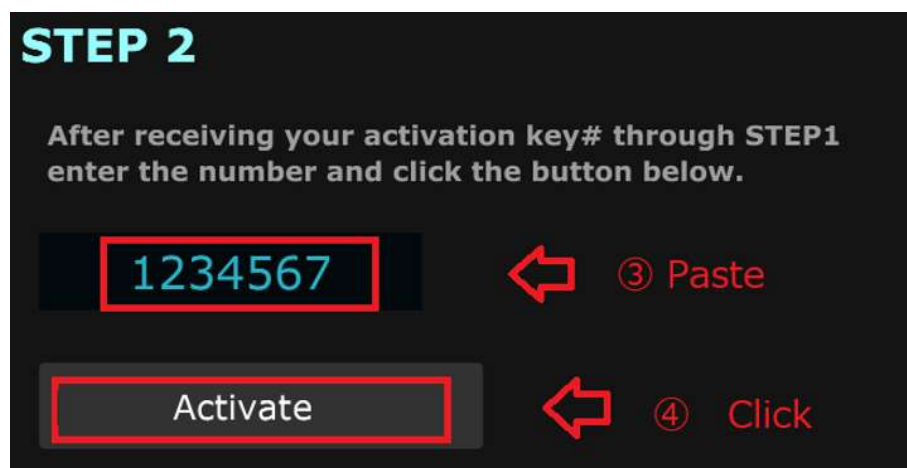

3. In the activation center web site, Paste or type your serial number and ID# (copied in the previous step) correctly like the image below.
Note: Your inputs in the Serial number and ID# cell must be 20digits with dash"- " for serial number, and 7 or 8digits number like the image.
Then, click the "Submit" button.

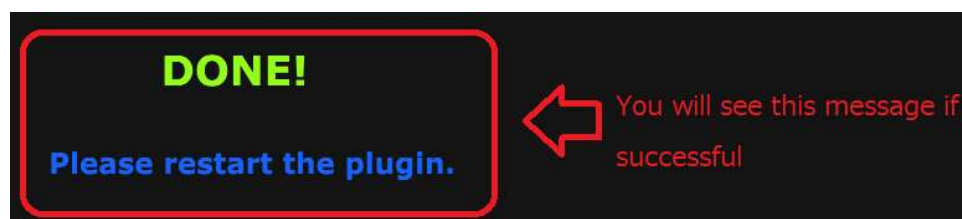

4. If your input is successfully submitted, you will be navigated to the next screen like the image below, and shortly after, you will receive an email with activation key# from minimalinst@gmail.com. Click “CONFIRM” if you see pop-up message underneath.

5. Copy your activation key# in the email you received in the step4 and open the plugin (DamiVoice), and then ③paste the activation key# into the cell in the **STEP2** section like the image below. [Make sure to put nothing but the activation key# (no space or anything before or after the activation key#).] ④Click “Activate” button.

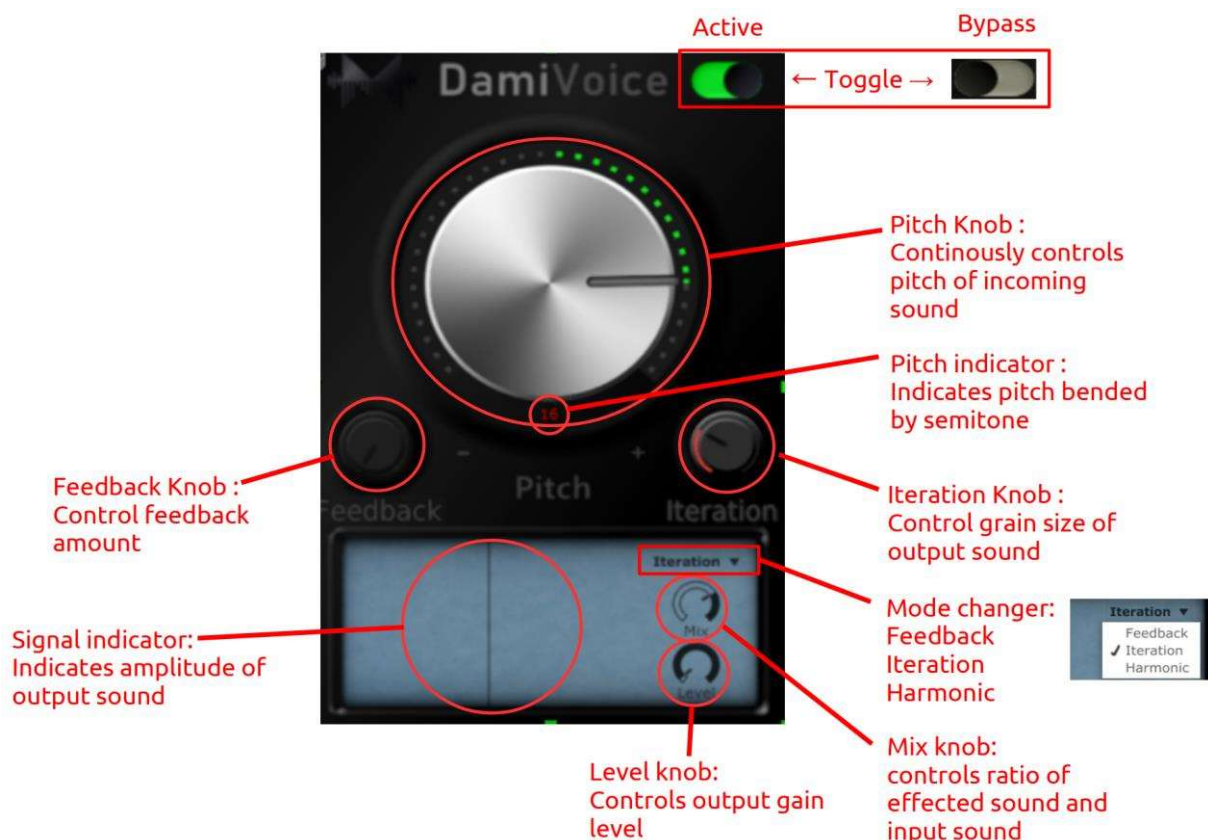

You will see message “DONE!” like below, if successful. Then close the plugin.

- Start your plugin host and open the plugin again. You will see the plugin UI like the image below. Your plugin is then activated, should be able to use it without any limitation. (Done!)

- Plugin User Interface

Thanks again for choosing our solutions!
